Accelerated Algebra I/Geometry A and Physical Science are high school courses for which students earn Carnegie credit towards graduation. Students taking these courses need to be aware that while the credit counts toward graduation, the grade is **NOT** included in the high school Grade Point Average (GPA). Students may not decline credit for these courses, and students will not be allowed to retake the course at the high school if credit is earned. We are also considering a change in course offering for next year to include Algebra I to replace Accelerated Algebra I/Geometry A. The course would remain an advanced class. The Geometry standards would be removed to ensure proper preparation for advanced coursework in high school.
