Marietta City Schools
2023-2024 District Unit Planner

## AP Precalculus

| Unit title | Unit 3-Trigonometric and Polar Functions | Unit duration (hours) | $30-35$ hours |
| :--- | :--- | :--- | :--- |

Mastering Content and Skills through INQUIRY (Establishing the purpose of the Unit): What will students learn?

## GA DoE Standards

## Standards:

### 3.1 Periodic Phenomena:

3.1.A: Construct graphs of periodic relationships based on verbal representations.
3.1.B: Describe key characteristics of a periodic function based on a verbal representation.
3.2 Sine, Cosine, and Tangent:
3.2.A: Determine the sine, cosine, and tangent of an angle using the unit circle.
3.3 Sine and Cosine Function Values:
3.3.A: Determine coordinates of points on a circle centered at the origin.
3.4 Sine and Cosine Function Graphs:
3.4.A: Construct representations of the sine and cosine functions using the unit circle.
3.5 Sinusoidal Functions:
3.5.A: Identify key characteristics of the sine and cosine functions.
3.6 Sinusoidal Function Transformations:
3.6.A: Identify the amplitude, vertical shift, period, and phase shift of a sinusoidal function.
3.7 Sinusoidal Function Context and Data Modeling:
3.7.A: Construct sinusoidal function models of periodic phenomena.

### 3.8 The Tangent Function:

3.8.A: Construct representations of the tangent function using the unit circle.
3.8.C: Describe additive and multiplicative transformations involving the tangent function.

### 3.9 Inverse Trigonometric Functions:

3.9.A: Construct analytical and graphical representations of the inverse of the sine, cosine, and tangent functions over a restricted domain.

### 3.10 Trigonometric Equations and Inequalities:

3.10.A: Solve equations and inequalities involving trigonometric functions.

### 3.11 The Secant, Cosecant, and Cotangent Functions:

3.11.A: Identify key characteristics of functions that involve quotients of the sine and cosine functions.

### 3.12 Equivalent Representations of Trigonometric Functions:

3.12.A: Rewrite trigonometric expressions in equivalent forms with the Pythagorean identity.
3.12.B: Rewrite trigonometric expressions in equivalent forms with sine and cosine sum identities.
3.12.C: Solve equations using equivalent analytic representations of trigonometric functions.

### 3.13 Trigonometry and Polar Coordinates:

3.13.A: Determine the location of a point in the plane using both rectangular and polar coordinates.

### 3.14 Polar Function Graphs:

3.14.A: Construct graphs of polar functions.

### 3.15 Rates of Change in Polar Functions:

3.15.A: Describe characteristics of the graph of a polar function.

## Concepts/Skills to support mastery of standards:

3.A Describe the characteristics of a function with varying levels of precision, depending on the function representation and available mathematical tools.
2.A Identify information from graphical, numerical, analytical, and verbal representations to answer a question or construct a model, with and without technology.
3.B Apply numerical results in a given mathematical or applied context.

3.C Support conclusions or choices with a logical rationale or appropriate data.
1.A Solve equations and inequalities represented analytically, with and without technology
1.B Express functions, equations, or expressions in analytically equivalent forms that are useful in a given mathematical or applied context.

Vocabulary: Parametric Equation, Radian Measure, Quadrantal Angle, Coterminal Angles, Inverse Function, Even Function, Odd Function, Sinusoidal, Transformation Features ( midline, amplitude, vertical shift, vertical stretch, phase shift, period, and input-coefficient), Ambiguous Case, Identity, Law of Cosines, Law of Sines, Polar Coordinate System

Notation

## Essential Questions

- Since energy usage goes up and down through the year, how can I use trends in data to predict my monthly electricity bills when I get my first apartment?
- How do we model aspects of circular and spinning objects without using complex equations from the $x$ - $y$ rectangular-based coordinate system?
- How does right triangle trigonometry from geometry relate to trigonometric functions?

## Assessment Tasks

## List of common formative and summative assessments.

Formative Assessment(s): Quizzes, TOTD, DeltaMath, Warm Ups, Desmos Activities

Summative Assessment(s): Quiz (3.1-3.3), Unit 3 A Assessment (3.1-3.7), Quiz (3.8-3.12), End Unit 3 Test
