Everything on the unit planner must be included on the unit curriculum approval statement.

Individuals and Societies IB Psychology Y1

Unit 2 Abnormal Psychology

Hours

34 Hours

Mastering Content and Skills through INQUIRY (Establishing the purpose of the Unit): *How do psychologists and psychiatrists identify, diagnose and treat abnormal conditions?*

Unit Description and texts

Unit will consist of an examination of the factors influencing diagnosis of mental disorders, the etiology of disorders, and the treatment of disorders

Text: Popov, Alexey, Lee Parker, & Darren Seath (2017). *IB Psychology Course Companion, 2nd Edition*. Oxford, UK: Oxford University Press.

Transfer goals/Skills

Approaches to learning (ATL)

Skills:

Research

Communication

Details:

Apply skills required to analyze and evaluate a simple psychological experiment using the GRAVE method..

Accurately identify/categorize mental disorders based on symptomatology, etiology and treatment.

Use research studies to support an argument

Category: Thinking

Skill Indicator:

Details:Apply skills required to analyze and evaluate a simple psychological experiment using the GRAVE method..

Accurately identify/categorize mental disorders based on symptomatology, etiology and treatment.

	Use research studies to support an argument	
Content/skills/concepts	Learning process	
<p style="text-align: center;"><u>Students will know the following content:</u></p> <ol style="list-style-type: none"> 1. Normality vs. Abnormality 2. Classification systems 3. Clinical Bias 4. Validity vs. Reliability of diagnosis 5. Categories of Abnormal behavior 6. Etiology 7. Symptomatology 8. Affective disorders 9. Anxiety disorders 10. PTSD 11. Therapies-Biological, Psychological, Culture & treatment, Effectiveness of treatments <p style="text-align: center;"><u>Students will develop the following skills:</u></p> <ol style="list-style-type: none"> 1. Answering ERQs (extended response questions) using research studies as evidence 2. Analyze and evaluate the results of a research experiment. 3. Compare/contrast symptoms, etiology and treatments of mental disorders 4. Identify potential bias and ethical considerations related to labeling behaviors as abnormal <p style="text-align: center;"><u>Students will grasp the following concepts:</u></p> <ol style="list-style-type: none"> 1. Use of effective teamwork and collaboration. 2. Applying learning to real-world problems and contexts. 3. Engaging in experiential learning. 	<p>Small group/pair work PowerPoint lecture/notes Group presentations</p> <p>Details: Students will receive direct instruction via slide presentations with embedded small group activities. Students will then work in pairs or small groups to complete activities to support their learning. Students will demonstrate their understanding and learning through group presentations and written essays.</p> <p>Others:</p>	
Language and Learning	TOK Connections	CAS connections
<p>Activating background knowledge Scaffolding for new learning Extending Language</p> <p>Details:</p> <ol style="list-style-type: none"> 1. Activating Prior Knowledge—utilizing learning from content in Year 1. 	<p>Personal and shared knowledge</p> <p>Details: Personal and Shared Knowledge—students will be collaborating on some activities (shared knowledge), but will need to analyze and evaluate research studies individually, building personal knowledge based on the results of their analysis.</p>	<p>Creativity</p> <p>Details: Creativity—students must think creatively to make an argument using the available research studies.</p>

<p>2. Scaffolding New Learning—organizers for planning the ERQ.</p> <p>3. Extending Language—utilizing an actual psychological experiment as the basis for their ERQ arguments, which requires students to read and understand at a high level.</p>		
---	--	--

Essential Understandings and Questions

Factual:

What is etiology?

Conceptual:

What is the difference between validity and reliability, and how are each determined?

Debatable:

How reliable are treatments for PTSD?

Assessment Tasks
List of common formative and summative assessments.

DP Assessments	HL Optional Topic #1-Paper Two	Formative Assessments	Abnormal Psychology Quiz#1 Practice ERQ Research studies charts Group mini-presentations on therapies	Summative Assessments	Essay test (ERQ) on Abnormal Psychology
