## Unit description and texts
- Measuring and describing change in two variables. Identifying limits, continuity, average rate of change, and instantaneous rate of change.
- Oxford AA textbook:
  - Chapter 5: Measuring change: Differentiation

## DP assessment(s) for unit
- Assessment #2 (5.1-5.2, 1.1-1.3)
- Assessment #3 (5.3, 5.4, 5.6, 1.7, 1.9, 2.1-2.2)
- Assessment #4 (5.6, 2.3-2.7)
All assessments will use previous IB exam questions from the Questionbank

## INQUIRY: establishing the purpose of the unit

### Transfer goals
*List here one to three big, overarching, long-term goals for this unit. Transfer goals are the major goals that ask students to “transfer” or apply, their knowledge, skills, and concepts at the end of the unit under new/different circumstances, and on their own without scaffolding from the teacher.*

Students should be able to:
- Identify limits of functions from tables and graphs.
- Explain average and instantaneous rates of change.
- Connect average rate of change to the concept of a derivative.

Published: Month, Year
Resources, materials, assessments not linked to SGO or unit planner will be reviewed at the local school level.
**ACTION: teaching and learning through inquiry**

<th>Content/skills/concepts—essential understandings</th>
<th>Learning process</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will know the following content:</td>
<td>Check the boxes for any pedagogical approaches used during the unit. Aim for a variety of approaches to help facilitate learning.</td>
</tr>
<tr>
<td>● Derivative rules:</td>
<td>Learning experiences and strategies/planning for self-supporting learning:</td>
</tr>
<tr>
<td>o Power rule</td>
<td>☒ Lecture</td>
</tr>
<tr>
<td>o Derivative of sin and cos</td>
<td>☐ Socratic seminar</td>
</tr>
<tr>
<td>o Product rule and quotient rule</td>
<td>☒ Small group/pair work</td>
</tr>
<tr>
<td>o Chain rule</td>
<td>☒ PowerPoint lecture/notes</td>
</tr>
<tr>
<td>Students will develop the following skills:</td>
<td>☒ Individual presentations</td>
</tr>
<tr>
<td>● Take derivatives of many types of functions including: polynomial, rational, trig, composite, and combinations of these types.</td>
<td>☐ Group presentations</td>
</tr>
<tr>
<td>● Implement the derivative rules to accurately find derivative functions.</td>
<td>☐ Student lecture/leading</td>
</tr>
<tr>
<td>Students will grasp the following concepts:</td>
<td>☐ Interdisciplinary learning</td>
</tr>
<tr>
<td>● Find and use derivatives for most types of functions.</td>
<td>Details:</td>
</tr>
<tr>
<td></td>
<td>Each section will start with direct instruction and introduction from the instructor.</td>
</tr>
<tr>
<td></td>
<td>Students will work in small groups to solve problems and complete explorations.</td>
</tr>
<tr>
<td></td>
<td>Discussions regarding method, alternate approaches, and efficiency will be regularly included in the class.</td>
</tr>
<tr>
<td></td>
<td>Teacher will provide multiple resources electronically and in person to support student learning.</td>
</tr>
<tr>
<td></td>
<td>☐ Other/s:</td>
</tr>
</tbody>
</table>

**Formative assessment:**
- IB Questionbank Practice problems
- TOTD – quick checks
- HW quizzes: properties of derivatives, product rule

### Summative assessment:

- Assessment #2 (5.1-5.2, 1.1-1.3)
- Assessment #3 (5.3, 5.4, 5.6, 1.7, 1.9, 2.1-2.2)
- Assessment #4 (5.6, 2.3-2.7)

Summative assessments include spiral review from year 1 content.

### Differentiation:

- ☒ Affirm identity—build self-esteem
- ☐ Value prior knowledge
- ☒ Scaffold learning
- ☒ Extend learning

### Details:

Derivative rules will build on the concept of derivatives in unit 1. Derivatives will be the focus of most of first semester, so it is important that the concept and all rules are understood. Many representations of derivatives and many resources will be used in class with access to additional resources for students who want or need more practice.

### Approaches to learning (ATL)

*Check the boxes for any explicit approaches to learning connections made during the unit. For more information on ATL, please see the guide.*

- ☒ Thinking
- ☒ Social
- ☒ Communication
- ☐ Self-management
- ☐ Research

**Details:**

- Thinking - making connections within the content and applications
- Social – partner work
- Communication – utilizing the language and notation of calculus

</table>

- ☐ Activating background knowledge  
- ☐ Scaffolding for new learning  
- ☑ Acquisition of new learning through practice  
- ☑ Demonstrating proficiency

**Details:** The topic of calculus will be new to the students. The vocabulary and notation will be demonstrated and learned through practice. Multiple notations are commonly accepted in calculus, all will be taught and used throughout the unit. Students will have ample opportunities to utilize the vocabulary and notation in class to get feedback from both the instructor and other students.

- ☑ Personal and shared knowledge  
- ☐ Ways of knowing  
- ☑ Areas of knowledge  
- ☐ The knowledge framework

**Details:** Students will be shown proofs of the different derivative rules to solidify understanding.

- ☐ Creativity  
- ☐ Activity  
- ☐ Service  

**Details:** N/A
