| <p>Students examine taking measurements precisely and reporting the correct uncertainty. Measurement uncertainties are propagated through data analysis to help determine the trustworthiness of a conclusion. Students also examine how to add and subtract vectors.</p> <ul style="list-style-type: none"> Bowen-Jones, Michael, and David Homer. IB Physics. Oxford: Oxford UP, 2014. INQUIRY: establishing the purpose of the unit

| |
|--|
| <p>Transfer Goals</p> <p><i>List here one to three big, overarching, long-term goals for this unit. Transfer goals are the major goals that ask students to “transfer” or apply their knowledge, skills, and concepts at the end of the unit under new/different circumstances, and on their own without scaffolding from the teacher.</i></p> |
| <p>Phenomenon: A plane can “fly blind” and arrive safely at the correct location by simply using vector coordinates.</p> <p>Statement of Inquiry: Measurement is a process of detecting an unknown physical quantity by using a standard quantity.</p> <ol style="list-style-type: none"> Students will derive units for a quantity from SI units. Students will analyze data and propagate uncertainty to fit a scatter plot graph with high and low gradients. Students will add and subtract differing types of vectors to solve problems involving vector components. |

Details:

Students will be continuously challenged to develop higher-order thinking skills as they take prior knowledge, combine it with new content, and analyze the data they collected to reach a conclusion

Students will communicate their findings to their peers in the form of small-group presentations.

Curriculum Unit Approval Statement
Every team member is expected to read and review the unit planner and contents contained in the unit planner.

This unit meets the rigorous review and approval process of Marietta City Schools. All components of the unit have been reviewed and approved including learning experiences, materials, resources, texts, and assessments. This unit's components:

- Are aligned to Georgia Standards of Excellence and MYP/DP subject area guide (if applicable)
- Are aligned to the pacing of the approved Subject Group Overview
- Provide resources that are appropriate for students' grade level, subject/course level, etc.
- Provide learning experiences that prepare students for course assessments

PLCs review each learning experience using three criteria and collaborate to provide explicit and specific information.

| | | |
|---|--|--|
| <p>Criteria I: Standards Alignment:</p> <p><i>Learning experiences should provide alignment to the standards and the MYP subject area guide (if applicable).</i></p> | <p>Criteria II: Materials, Resources, and Text Complexity and Controversial Topics and Issues:</p> <p><i>Materials, resources, and texts are grade level and content appropriate.</i></p> | <p>Criteria III: Assessment Alignment:</p> <p><i>Since assessment drives instruction, learning experiences must align to and prepare students for regular common formative and summative assessments used to determine whether students are mastering standards-based content and ATL skills.</i></p> |
