Statement of Inquiry	As a society increases in complexity and interacts with other societies, the complexity of government also increases.	While change occurs over time, there is continuity to the basic structure of that society.	Actions of individuals, groups, and/or institutions affect society through intended and unintended consequences.	The distribution of power in government is a product of existing laws and documents combined with contemporary values and beliefs.	In a democracy, rule of law establishes local and state government procedures for making policies.	

MCS MYP (COURSE) Subject Group Overview

Global Context	Fairness and Development Students will explore rights and responsibilities; the relationship between communities; sharing finite resources with other people and with other living things; access to equal opportunities; peace and conflict resolution. Identities and Relationships Students will explore identity; beliefs and values; human relationships including, communities and cultures; what it means to be human.	Identities and Relationships Students will explore identity; beliefs and values; human relationships including, communities and cultures; what it means to be human.	Identities and Relationships Students will explore identity; beliefs and values; human relationships including, communities and cultures; what it means to be human.	
Key Concepts	Systems are sets of interacting or interdependent components. Systems provide structure and order in human, natural, and built environments. Systems can be static, dynamic, simple, or complex	Relationships are the connections and associations between properties, objects, people and ideas—including the human community’s connections with the world in which we live. Any change in relationship brings consequences—some of which may occur on a small scale, while others may be far-reaching,	Systems are sets of interacting or interdependent components. Systems provide structure and order in human, natural, and built environments. Systems can be static, dynamic, simple, or complex	Change is a conversion, transformation, or movement from one form, state or value to another. Inquiry into the concept of change involves understanding and evaluating causes, processes and consequences	Relationships are the connections and associations between properties, objects, people and ideas—including the human community’s connections with the world in which we live. Any change in relationship brings consequences—some of which may occur on a small scale, while others may be far-reaching, affecting large networks and systems such as human societies and the planetary ecosystem.
