In this unit, students will compare and order fractions, and add and subtract fractions with unlike denominators. They will use reasoning and build on strategies learned in previous grades for generating equivalent fractions. Students will extend their understanding of linear representations and use number lines to solve problems with dot plots showing measurements with ½, ¼, , and ⅛. Students will also ask and answer statistical questions using the statistical reasoning framework which includes collecting, organizing, and interpreting data.

**5.NR.3:** Describe fractions and perform operations with fractions to solve real-life, mathematical problems using part whole strategies and visual models.
- **5.NR.3.2** Compare and order up to three fractions with different numerators and/or different denominators by flexibly using a variety of tools and strategies.
- **5.NR.3.3** Model and solve problems involving addition and subtraction of fractions and mixed numbers with unlike denominators.

**5.MDR.7:** Solve problems involving customary measurements, metric measurements, and time and analyze graphical displays of data to answer relevant questions.
- **5.MDR.7.2** Ask questions and answer them based on gathered information, observations, and appropriate graphical displays to solve problems relevant to everyday life.
  *This part of the standard relates to the linear representations, number lines and dot plots part of 5.NR.3.*

**5.MP.1-8** Display perseverance and patience in problem-solving. Demonstrate skills and strategies needed to succeed in mathematics, including critical thinking, reasoning, and effective collaboration and expression. Seek help and apply feedback. Set and monitor goals. *(It is important to note that MPs 1, 3 and 6 should support the learning in every lesson.)*
- **5.MP.1** Make sense of problems and persevere in solving them.
- **5.MP.2** Reason abstractly and quantitatively.
- **5.MP.3** Construct viable arguments and critique the reasoning of others.
- **5.MP.4** Model with mathematics.
- **5.MP.5** Use appropriate tools strategically.
- **5.MP.6** Attend to precision.
- **5.MP.7** Look for and make use of structure.
- **5.MP.8** Look for and express regularity in repeated reasoning.

The [Framework for Statistical Reasoning](#) and the [Mathematical Modeling Framework](#) should be taught throughout the units. The [K-12 Mathematical Practices](#) should be evidenced at some point throughout each unit depending on the tasks that are explored. It is important to note that MPs 1, 3 and 6 should support the learning in every lesson.
### Essential Questions

1. How are equivalent fractions helpful when solving problems?
2. How can a fraction be greater than 1?
3. How do I know if a fraction is greater or less than another fraction?
4. How does the numerator help me compare fractions?
5. How does the denominator help me compare fractions?
6. How does a model help me add and subtract fractions and mixed numbers?
7. What are some strategies for adding and subtracting fractions and mixed numbers?
8. How can I represent and analyze fractional data points on a dot plot?

### Assessments

**Formative Assessment(s):**
- MCS K-5 Activity & Assessment Collection
- 5.NR.3.2
- 5.NR.3.3
- 5.MDR.7.2

**Performance Assessment:**
- Savvas Topic Performance Task TE pp. 327-328 (Students will use a real-life scenario involving tying knots to add and subtract fractions).

*It is the responsibility of each school’s grade level PLC to identify appropriate instructional lessons and resources, based on data and student needs, using the suggested pacing duration. The following learning tasks have been vetted to align to the standards included in this unit. The GA Dept. of Education strongly recommends that any additional tasks, resources, and/or assessments used for instruction should be vetted using the Quality Assurance Rubric, to ensure alignment to the state standards.*
5.NR.3 Describe fractions and perform operations with fractions to solve real-life, mathematical problems using part whole strategies and visual models.

**GADOE Intervention Tasks**

**Equivalent Fractions:** Compare fractions by generating like units and constructing a visual model

**Non-Unit Fractions:** Determine “closeness to 1” or distance from 1 for a variety of fractions

**Estimating with Fractions:** Solve problems that involve adding and subtracting fractions with related denominators.

**Comparing Apples with Apples:** Solve problems that involve adding and subtracting fractions.
Using Equivalent Fractions and Representations to Add and Subtract Fractions with Unlike Denominators
In this learning plan, students will build their knowledge of adding and subtracting fractions with unlike denominators by using equivalent fractions and visual fraction models. Students will not be taught an algorithm for adding and subtracting fractions with unlike denominators. Instead, they will be provided opportunities to discover an algorithm for adding and subtracting fractions with unlike denominators. (Suggested Timeframe: 2-3 days)

### 5.MDR.7.2 Ask questions and answer them based on gathered information, observations, and appropriate graphical displays to solve problems relevant to everyday life.

**Fractions All Around Us**  
*Also includes 5.MDR.7*  
In this learning plan, students will compare and order fractions, and add and subtract fractions with unlike denominators. They will use reasoning and build on strategies learned in previous grades for generating equivalent fractions. Students will extend their understanding of linear representations and use number lines to solve problems with line plots showing measurements with 1 2, 1 4, and 1 8. Students will also ask and answer statistical questions using the statistical reasoning framework which includes collecting, organizing, and interpreting data.

### SAVVAS enVision Topic 10: Represent and Interpret Data

- Lesson 10-1: Analyze Line Plots
- Lesson 10-2: Make Line Plots
- Lesson 10-3: Solve Word Problems Using Measurement Data
- Lesson 10-4: Problem Solving: Critique Reasoning

**MIP Module 12: Representing and Interpreting Data**

The key ideas focused on in this module include: making line plots with units in halves, fourths, and eighths and solving multistep problems about the data shown on the line plots.
