

Check out these digital projects created by 3rd grade MILE students!

Material World

invertebrate  
cold-blooded  
mollusks

Elvic #1

Mooker

Pastus Fly Trap  
Regular

Diet: algae, Volves  
an d wds, rocks  
Skin texture: smooth and  
MAX height 5ft

Super Sucker

Habitat: Ocean Floor  
Diet: Micro Plankton  
Invertebrate  
Mammal  
Cold-Blooded

Eats flies + insects  
Douse plant  
Takes down by being  
On its side and turning brown  
grows up to 2ft tall  
has eyes to see prey/mollusks  
Senses: see, feel, taste

uses stem to bring  
prey close  
only 3 of them  
in the world

Emomangyanstingwin A.K.A.  
Devil Nightmare creature

Pharon  
Loutner  
#1658

Best flying wings

Unbreakable outer shell

Wrinkly legs

Use for smothering  
its prey

Claws eye pincers

Characteristics:

- Invertebrate
- Warm blooded
- Mammal

Fun fact!  
Other names are

Lives in sky/land  
Swims  
Eats people with sporebats  
Other #2  
Grows to be 10 ft tall &  
66 ft wide  
Can swim

Floople

Vertebrate  
Warm-blooded  
Mammal  
4-Legged  
Folies in the Snow  
Herbivore

By: Emma Shelton

Scholars could choose either a physical or a digital project. Those who chose a physical project visited the STEAM Store for materials. Those who chose a digital project used Tinkercad.

# CREATE

Land Pollution is affecting the way people and animals live, it is also affecting the EARTH!!!

Animals that you think are cute could be seriously hurt and might be getting sick. If you love animals help save them!!!

Some animals get sick by you throwing trash in the wild that can not compost like cans, and water bottles.

How can you help :  
recycle,  
use reusable stuff (like cloth towels)

SO PLEASE HELP THE ANIMALS!!!!!!!
