

Marietta Middle School Orchestra

Dear Future MMS Blue Devil,

Welcome to middle school! We are excited to welcome you to the growing Marietta Middle School Orchestra program. As a member of the orchestra, you have the opportunity to perform and bring music into your school and community.

Orchestra students have the opportunity to continue their studies on a string instrument and further develop the techniques and skills we began to learn in 6th grade.

We play exciting music from all different styles – classical, pop, rock, jazz, and movie themes. The possibilities are endless once you learn how to play your instrument.

The orchestra performs 3-4 regular concerts throughout the school year. Additionally, students who participate in the spring trip have the opportunity to perform in various locations around the country! We also offer a chamber strings program which performs regularly at school events.

I look forward to being your orchestra teacher next year!

Why Orchestra?

Research proves that music students are:

- Score significantly higher on the SAT and other standardized tests than the average general student body population; string students have the highest among music students
- Leaders in classes and activities; members of academic honor groups
- In the upper 10 percent of their graduating class
