

Schoology App. Instructions

To log in with your existing account, open the Schoology app on your mobile device:

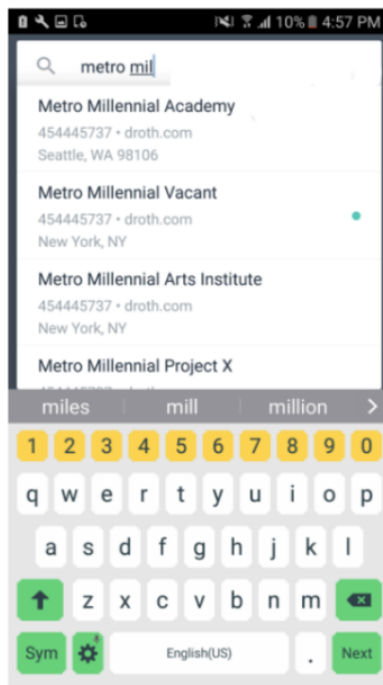

If you are logging in as a student:

Step 1 — Tap **Find your school or domain** to log in through your school or district.

If you are logging in as a parent:

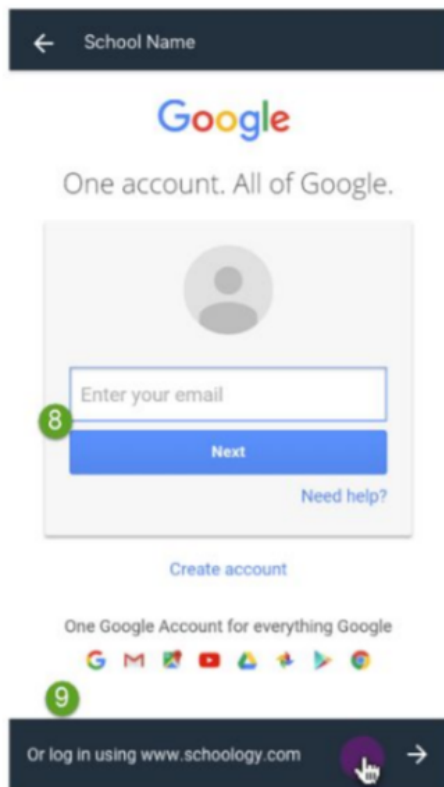

Step 2 — Tap **CONTINUE** to log in through app.schoology.com. Use this option if you use the Basic version of Schoology, or if you aren't included in your organization's Single-Sign On method.

If logging in as a student:

Use the keyboard to enter the name of your school or organization. As you type, matching choices populate in the list. If your school uses a custom domain on the web version, you may enter the domain in this field.

Tap the name of your organization when it displays.

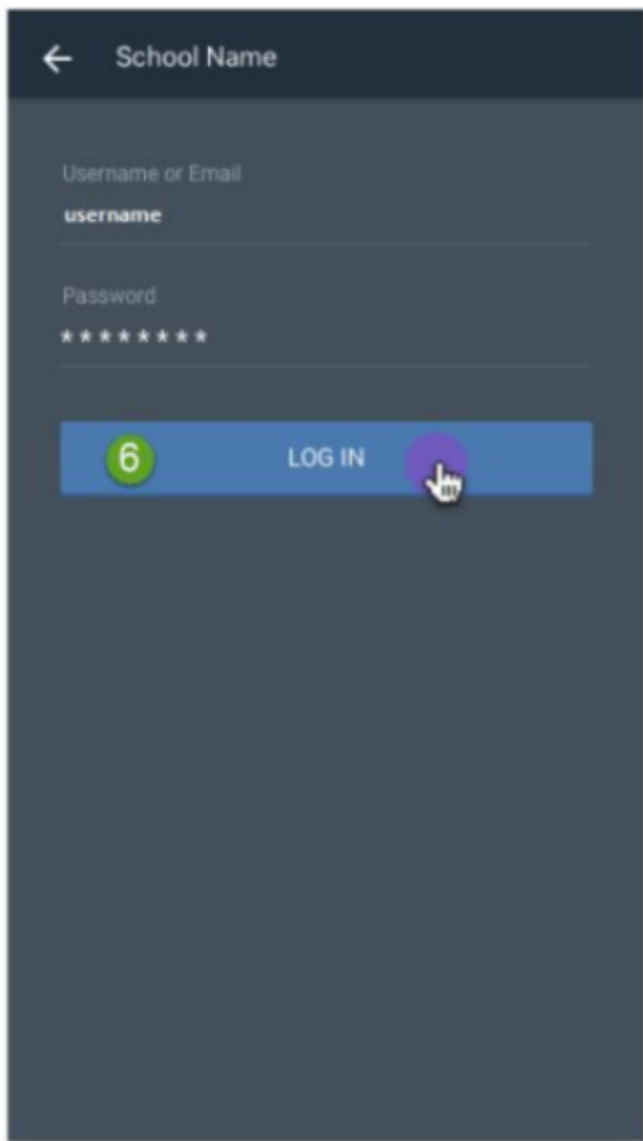

For example, if your organization uses Google SSO, you are brought to the Google sign in screen. Enter your Google credentials to sign in to Schoology.

Note: Your organization's preferred login screen displays automatically for each subsequent login from the device. For example, if your school shares devices, the Google login screen displays automatically for the next student who logs in on the device.

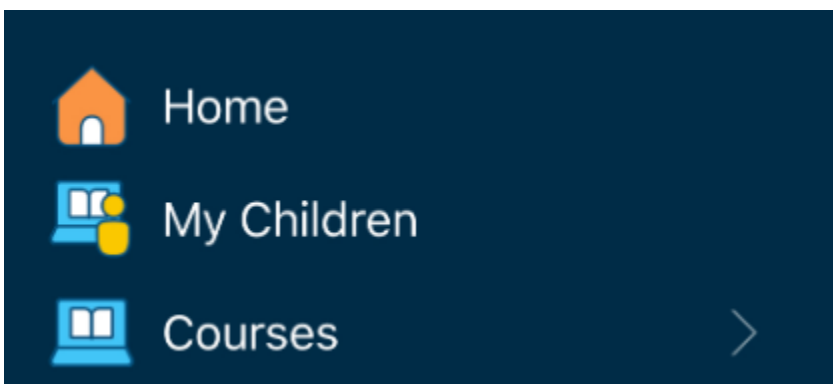

You can also tap the link at the bottom to use your email and password combination to log in.

If you are logging in as a parent:

Enter your login credentials and tap **LOG IN**.

To view your child's information, click on "My Children"

Adding additional notifications:

Push Notifications

You can choose to receive a push notification on your iOS device whenever an important piece of content is added to a course or group you are directly enrolled in. Here are some examples of the types of occurrences push notifications would relay:

- Course update post
- Group comments on updates and discussions
- New assignment or discussion post
- Receive a private message

When a notification arrives, if the app is closed, then you may see a banner or alert display on your screen. If the Schoology app is open, then the notification will be displayed on your screen. Tapping the notification will take you to that piece of content within the Schoology iOS app.

Enabling Push Notifications

To enable notifications:

1. Make sure you've downloaded the latest version of the Schoology iOS app from the [Apple AppStore](#).
2. After installing the update and logging into the app, you will be prompted to enable notifications.
3. Select OK, and you will be registered for notifications.
